

WEB SITE VS WEB APP

In the world of
coding, practice
is not an option
its necessity!!!!

Website vs Web App

Are You Ready?

Types of Websites

Websites do not need to set up a verification process because users do not interact with the content.

Web app, where users can create content, transmit sensitive information, & send private messages, authorization is required

Examples of Website

— intersection.is —

— jonathandacosta.com —

Examples of Web Apps

— amazon.com —

web.whatsapp.com

To use WhatsApp on your computer:

1. Open WhatsApp on your phone
2. Tap Menu or Settings and select WhatsApp Web
3. Point your phone to this screen to
